Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On the last two lines of page 17 of the Specification, the date says "October 26, 200". This should be corrected as saying "October 26, 2000".

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 1-8 and 10-26 (renumbered as 1-25) are allowed. The closest prior art is Barnikol-Oettler et al. (AN CA62:11871e, CAOLD, DN 62:66733, HCAPLUS, abstract of J. Prakt. Chem. (1965), 27(1-2), 18-23).

The 17-methylene steroids of the invention have a hybrid-type profile of action in the sense that they act as inhibitors of 5alpha-reductase and simultaneously as gestagens. The data presented in Tables 1 and 2 show a hybrid-type profile of action of the compounds according to the presently claimed invention. These compounds and their use were neither taught nor suggested by the prior art of record.

Examiner is thankful to attorney Csaba Henter for his cooperation during the prosecution of this Application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
